**WiBee-PI MySQL**

The WiBee MySQL package for Raspberry

WiBee-PI MySQL is the package for Raspberry WiBee that with a UBee nano key becomes a Controller ZigBee autonomous able to manage, to control and to monitor a set of objects independently ZigBee through an embedded Web site and / or a CleoBee™ remote application.

WiBee-PI MySQL utilizes the Raspbian distribution and requires mysql database and apache2 http server.

To install the package WiBee-PI MySQL, you will :

- Update the list of packages,
- Install Apache and MySQL servers,
- Install package,
- Verify dependencies.

After installation, you can now connect on the website through the following link :

http://[IP address of the Raspberry]/wibee

or

with the CleoBee™ remote application.

WiBee-PI MySQL requires a **SD Card of 8GB** for an optimal use.

A **preinstalled SD Card of 8GB** with WiBee-PI MySQL, mysql and apache2 is also available.
