

WiBee-PI PostgreSQL

The WiBee PostgreSQL package for Raspberry

WiBee-PI PostgreSQL is the package for Raspberry WiBee that with a UBee nano key becomes a Controller ZigBee autonomous able to manage, to control and to monitor a set of objects independently ZigBee through an embedded Web site and / or a CleoBee™ remote application.

WiBee-PI PostgreSQL utilizes the Raspbian distribution and requires postgresql database and apache2 http server.

To install the package WiBee-PI PostgreSQL, you will :

- Update the list of packages,
- Install Apache and PostgreSQL Servers,
- Install package,
- Update dependencies.

After installation, you can now connect on the website through the following link :

[http://\[IP address of the Raspberry\]/wibee](http://[IP address of the Raspberry]/wibee)

or

with the CleoBee™ remote application.

WiBee-PI PostgreSQL requires a **SD Card of 8GB** for an optimal use.

A **preinstalled SD Card of 8GB** with WiBee-PI PostgreSQL, postgresql and apache2 is also available.
