

ZPilot

Zigbee™ command of electric heater

The product ZPilot is a Zigbee™ module to command of electric heater by wire pilot.

The system of command of electric heater allows to emit 6 orders following the heaters electric:

- Comfort
- Comfort – 1 °C
- Comfort – 2°C
- Economic
- Frost protection
- Off

User can configure it with a Zigbee™ manager (Cf. CleoBee™).

ZPilot is also a Zigbee™ router. Then, with it, you can expand the network to cover your entire house.

Do not open the ZPilot when it's working.
